

Data Exploration and Preprocessing

Date	23 September 2026
Team ID	Individual / To be filled
Project Title	Global AI Adoption in Education: A Comprehensive Global Performance Intelligence Report
Maximum Marks	10 Marks

The dataset will be explored, cleaned and transformed so the final Tableau analysis is accurate and consistent.

Section	Project-Specific Description
Data Overview	Review countries/regions, years, indicators and key measures available in the final dataset.
Data Cleaning	Handle missing values, duplicates, inconsistent labels and data-entry errors.
Data Transformation	Filter, sort, pivot/unpivot where needed and create calculated fields or measures.
Data Type Conversion	Convert year/date fields and adoption/indicator measures to appropriate data types.
Column Splitting and Merging	Split or merge fields when required by the final data structure.
Data Modeling	Define relationships between tables using keys such as country, region and year.
Save Processed Data	Save the cleaned dataset for reuse and connect the processed data to Tableau.

Preprocessing Checklist

- Check row/column counts
- Check missing values
- Check duplicates
- Standardize country/region names
- Validate data types and numeric ranges
- Save the final processed dataset
